BrightPath Tech

Proposal in response to RFP-2026-017: Enterprise Order-to-Cash Integration Platform
Submitted to: Meridian Foods Pvt Ltd (fictional)

1. Executive Summary

BrightPath Tech is delighted to respond to RFP-2026-017: Enterprise Order-to-Cash Integration Platform from Meridian Foods Pvt Ltd (fictional). We offer the lowest price in the market and the fastest delivery: a complete order-to-cash integration live in five months. Our lean delivery model lets us pass the savings directly to Meridian.

We understand that Meridian wants its ERP, warehouse, CRM and invoicing systems to work together. Our solution uses a lightweight integration layer and standard connectors to achieve this quickly.

2. Proposed Solution

BrightPath Flow is a generic integration layer that uses standard connectors for the ERP, the CRM and the invoicing portal. We follow industry best practices for integration design. The solution is hosted on a single cloud region and can be scaled by adding servers when required.

Data mapping will be done by our consultants during the build. We do not currently publish performance benchmark results.

3. Implementation Plan

We will deliver in five months using two phases: Phase 1 Build (3 months) and Phase 2 Testing and Go-live (2 months). A team of five engineers led by a delivery lead will carry out the work. Milestones are build complete in month 3 and go-live in month 5. A detailed project schedule and a risk log will be shared at project kick-off.

4. Price Table and Assumptions

Item	Description	3-year cost (INR lakh)
Platform subscription (3 years)	BrightPath Flow, 2 environments	70.0
Implementation services	Build, testing, go-live	95.0
Connectors and training	Standard connectors, 10 user-days	20.0
Support (3 years)	Email support, business hours	25.0
Total	**Total contract price (3 years)**	**210.0**

Assumptions

- Fixed all-inclusive price for the scope described; the total contract price includes all listed items.
- Payment terms: 40% on kick-off, 40% on build complete, 20% on go-live.
- Prices exclude GST. Custom connectors beyond the standard set are not included.

5. Security and Compliance

BrightPath follows industry best practices for security. Data is protected using TLS in transit and encrypted storage. Our ISO 27001 certification is in progress and is planned for the second quarter of next year. Penetration testing and disaster recovery arrangements are planned for after go-live.

6. Support and Experience

Support is provided by email only during business hours with a best-effort response. BrightPath was recently established in 2022 and has completed one similar project, for a regional distributor. A reference for that project is available on request.
