NexaWorks

Proposal in response to RFP-2026-017: Enterprise Order-to-Cash Integration Platform
Submitted to: Meridian Foods Pvt Ltd (fictional)

1. Executive Summary and Understanding of the Requirement

NexaWorks submits this proposal for RFP-2026-017: Enterprise Order-to-Cash Integration Platform from Meridian Foods Pvt Ltd (fictional). Meridian needs reliable, auditable order-to-cash flow across SAP S/4HANA, the warehouse management system, the CRM and the e-invoicing portal, handling peaks of about 2,500 orders per hour. We understand that the business risk lies in the cutover period, so our proposal emphasises disciplined delivery and strong post-go-live support.

NexaWorks offers a balanced solution: solid architecture, certified security, a fair price (INR 340 lakh over three years) and a seven-month programme with a delivery and support model that we consider the strongest in this competition.

2. Proposed Solution and Technical Approach

NexaFlow is built on a microservices architecture deployed on Kubernetes with auto-scaling and multi-AZ failover. Integration uses REST APIs and webhooks plus a Kafka-based event bus, and SAP integration uses BAPI and IDoc interfaces. A canonical data model and field-level mapping documents are produced for each interface. Load tests are run against a target of 4,000 transactions per hour before go-live.

3. Implementation Plan, Timeline, Team and Milestones

Delivery is organised into five phases over seven months: Phase 1 Mobilisation and Discovery (4 weeks), Phase 2 Design (4 weeks), Phase 3 Build in three two-week sprints per module (12 weeks), Phase 4 Integration Testing and UAT (6 weeks) and Phase 5 Cutover, Go-live and Hypercare (4 weeks plus 8 weeks of hypercare). Milestones are M1 Mobilisation (week 4), M2 Design sign-off (week 8), M3 Build complete (week 20), M4 UAT sign-off (week 26) and M5 Go-live (week 30).

Team and governance: a team of 14 full-time specialists, including a project manager, a solution architect, a test lead and a change manager. A RACI matrix is agreed in week 1, and a monthly steering committee with Meridian sponsors reviews progress. Knowledge transfer and role-based training are scheduled in the last eight weeks.

Risk plan: we maintain a risk register with owners and mitigation actions; the eight initial risks are SAP interface changes, data quality, key-user availability, performance at peak, integration environment delays, scope creep, cutover window overruns and resistance to change. A documented cutover plan includes a rollback procedure and contingency window, rehearsed twice before go-live.

4. Price Table and Assumptions

Item	Description	3-year cost (INR lakh)
Platform licence (3 years)	NexaFlow core, Kafka, 4 environments	110.0
Implementation services	Mobilisation to hypercare	135.0
SAP and CRM connectors	BAPI/IDoc and REST connectors	30.0

Training and knowledge transfer	30 user-days	10.0
Support (3 years)	24x7 support, named TAM, SLA 99.9%	55.0
Total	**Total contract price (3 years)**	**340.0**

Assumptions

- Fixed price for implementation and hypercare; changes follow the change request process.
- Payment terms: 15% on mobilisation, 25% on design sign-off, 30% on UAT sign-off, 30% on go-live.
- The price is all-inclusive of 24x7 support. Prices exclude GST and are valid for 120 days.

5. Security, Compliance and Risk Controls

NexaWorks is ISO/IEC 27001 certified and has a SOC 2 Type I report, with the Type II audit window under way. An annual penetration test is performed by an external firm. Data is encrypted with AES-256 at rest and TLS 1.2 or higher in transit, with role-based access control, multi-factor authentication and audit logs retained for 12 months. Data is hosted in the India region. Disaster recovery targets are an RTO of 8 hours and an RPO of 30 minutes.

6. Support Model, Experience and References

NexaWorks provides 24x7 support with a named Technical Account Manager. Priority 1 incidents (Severity 1) receive a 15-minute response time and a 4-hour resolution target; the platform SLA is 99.9% with service credits for any breach. A customer satisfaction (CSAT) score of 4.6 out of 5 was recorded over the last four quarters.

We have delivered six similar integration projects over the last four years. References: Mr. S. Iyer, VP Operations, Godavari Dairy (fictional); Ms. P. Menon, CIO, Malabar Spices (fictional); Mr. D. Shetty, Head of IT, Western Grains (fictional).
